Summary

I am Rishabh, working at the intersection of AI research and engineering. My research spans text and multimodal domains across the post-training stack, from synthetic data curation and supervised fine-tuning to reward modeling, reinforcement learning for alignment, and model evaluations.

Work Experience

- **ServiceNow - Senior Research Scientist** **Hyderabad, India**
Aug '23 – Present
I work on improving LLMs in post-training through data curation, fine-tuning, reinforcement learning and benchmarking. Some of my works: [Apriel-15B Series](#) | [Datasets, Alignemnt and Benchmarking](#) | [Agentic RL](#).
 - **Facebook AI Research - AI Resident** **California, U.S.**
Nov '21 – Dec '22
I worked with [Marcus Rohrbach](#) on reliable multimodal models and enhancing their text recognition capabilities. [Selective VQA](#) | [End-to-end text detection](#).
 - **Verisk AI – Research Intern** **Hyderabad, India**
May – Oct 2021
I worked on joint language and vision understanding of multimodal content and semantic understanding of natural language documents.
 - **Google Summer of Code – Software Developer Intern** **Remote, India**
Apr – Sept 2018
I developed an application enabling users to report incidents thus facilitating nearby assistance and communication.
